SWAP STIRRUP

FEATURES

Made with high quality materials, the Horsena Swap Stirrups are designed to ensure comfort and safety. The lateral arm with an opening of 90° is meant to release the foot in the event of a fall. The slightly oriented hook allows a natural leg position. The slightly oriented hook allows a natural leg position. The anatomic tread pad with an inclination of 5° helps to keep the heels down and its ergonomic shape encourages the correct position of the foot at the center of the stirrup. The network of holes, combined with the 3D structure, guarantees a optimal grip and a rapid expulsion of dirt.
